

*I hate school!
I always feel so stupid.*

**Make DRAMATIC
improvements in
your child's
learning without
taking your whole
summer to do it!**

*Do in 6 weeks what
would normally take 32-
40 weeks.*

**Break the cycle of pain
and frustration.**

*Why does math have to be
so hard?*

What if I can't get into college?

**Stop the uncertainty, and
exhaustion of learning and
attention problems.**

For information or registration call 909-598-2482

Problem Solving

3 hours per day

Activities are fun, varied, challenging, and highly effective in improving attention awareness and control.

Stowell Learning Center

Summer Programs 2009

Think and react faster in school and social situations

Improve attention and mental processing

Improve confidence

Make significant improvement in math or reading skills before school resumes

Dramatically improve your child's skills in only 6 weeks.

*Learning and attention problems do not have to cripple your child's education and your family life. Current brain research and our experience with thousands of children and adults over the past 25 years tells us that the brain can be retrained to think in new ways. At Stowell Learning Center, we help people **eliminate the pain, frustration, and embarrassment** associated with a learning problem by solving the underlying issues that are causing it.*
